

Western Response Resource List

Overview

Oil spill contingency plan holders in Washington State now have access to a Web-based database of oil spill response equipment. The Western Response Resource List (WRRL) outlines various types of response equipment maintained by participating private and public response organizations in the Pacific Northwest.

The Department of Ecology, the U.S. Coast Guard, other state and federal agencies, and participating public and private response entities urge oil spill contingency plan holders, contractors, vendors, and others to use the WRRL to list their response equipment. This uniform system to locate and order response equipment during a spill helps control costs, makes responses and cleanups more effective, and protects the environment.

How WRRL can help

The WRRL allows oil spill preparedness planners and responders to:

- Utilize a system for describing, cataloging, ordering, and tracking oil spill response equipment.
- Display data for use in developing and reviewing oil spill contingency plans.
- Evaluate spill readiness drills, including lessons learned, to improve response.
- Describe a uniform method of effective mutual aid for ordering equipment from multiple sources during spills.
- Keep accurate cost accounting information during responses.
- Plan for effective demobilizing of equipment after spill incidents.

MORE INFORMATION

For more information about the Western Response Resource List (WRRL), including how to participate, please contact:

Al Hielscher
Genwest Systems, Inc.
425- 771-2700

Special accommodations:

If you need this publication in an alternate format, call the Spills Program at 360-407-7455. Persons with hearing loss, call 711 for Washington Relay Service. Persons with a speech disability, call 877-833-6341.

The WRRL site

The WRRL Web site is located at <http://www.wrri.us> and hosted by Genwest Systems. The WRRL can be downloaded in a variety of electronic formats. The list is maintained by subscribers including federal and state agencies, response contractors, vendors, and industry representatives that have their own response equipment.

Using the WRRL

Standardized equipment information

Response organizations in the Northwest have agreed on "kind and type" labels for response equipment based on capabilities, size, and use. All equipment found on the WRRL is categorized by these designations.

Advance planning and drill design

Companies that must develop oil spill contingency plans for state and federal authorities can use the WRRL to develop lists of equipment – and may refer to the WRRL in their written plans. The WRRL maintains the following type of information:

- Locations where equipment is stored.
- Equipment transit times.
- Lengths and types of available vessels.
- Lengths and types of oil boom.
- Oil skimming vessels and estimated daily recovery capacity.
- Temporary storage capacity for barges, vacuum trucks, tanks, and bladders.

Select to download equipment list.

Select to search for equipment.

Select to find contact information for a participant.

Select name to access equipment list.

Select globes to access organization Web page.

WRRL (Western Response Resource List)

Welcome to the Western Response Resource List, an oil spill response equipment database maintained by regional equipment owners and hosted by Genwest Systems, Inc.

About this web site:

- > Best viewed in Windows using Internet Explorer 7; on Macs, Firefox 2.0 or greater.
- > It is an equipment inventory database maintained by participating response organizations listed below.
- > Equipment listed here may or may not be available at any given time. Check with the listed contact for current availability.

System Status:

- > Site revised and deployed on July 23, 2006. Updates include revised Kind-Type classifications, etc.
- > Please review your equipment records to verify data transfer to new web site was accurate. Thanks!

User Account and Data Access:

- > **For read-only access to this database:**
On the WRRL web site password entry screen, click the "Guest" button and log in.
- > **For participating organizations:**
Use your specified Account Name and Password.
- > **To become a WRRL member:**
Contact the Genwest site administrator to become a participating member. Send your request to: wrri@genwest.com

Participating Organizations: (click on name to view equipment records, click on world icon to view organization's web site)

Able Cleanup Technologies	Global Diving & Salvage	Tidewater Barge Lines
Ballard Diving & Salvage	Islands' Oil Spill Assoc.	USCG District 13
Big Sky Industrial	Marine Spill Response Corp.	USCG District 14
Burrard Clean Operations	McNeil Island Corr. Ctr.	US Navy Region Northwest
CCSPNE	NRC Environmental Services	US Navy SUPSLV
